

U.S. Customs and Border Protection Accepted Elbit Systems of America's Third Successfully Deployed Border Security System

February 6, 2018

FORT WORTH, Texas, February 6, 2018 /PRNewswire/ --

U.S. Customs and Border Protection (CBP) accepted the latest Integrated Fixed Tower (IFT) border security system deployed by Elbit Systems of America, LLC. This IFT system, located in the Sonoita, Arizona, Area of Responsibility (AoR), marks the company's third successful deployment of the system. Other previous deployments of IFT accepted by CBP were for the Douglas and Nogales, Arizona AoRs.

"Our advanced technologies provide U.S. Customs and Border Protection with trusted border security capabilities," said Raanan Horowitz, President and Chief Executive Officer of Elbit Systems of America. "America's Border Patrol agents rely on our operationally proven solutions for greater situational awareness and enhanced safety."

As the system integrator, Elbit Systems of America furnishes the sensor towers with radar, day/night cameras, and command and control software that combines data into a single operating picture. Information from all the towers is networked into Border Patrol Station command and control centers, which increases situational awareness for Border Patrol Agents. IFT has proven to be a reliable system and provides CBP with 24/7 surveillance coverage. The system also provides CBP with a platform to integrate existing and future sensors to further improve border protection and agent safety.

On the path to system acceptance, significant milestones must occur. Several months of construction, integration, test activity, and system verification ensure each IFT meets performance requirements. Each system must detect, track, identify, and classify border activity. Elbit Systems of America continues to meet customer performance and schedule requirements, as well as adhering to cost goals for this program.

About Elbit Systems of America, LLC

Forward Looking Statement

This press release contains forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended) regarding Elbit Systems Ltd. and/or its subsidiaries (collectively the Company), to the extent such statements do not relate to historical or current fact. Forward-looking statements are based on management's expectations, estimates, projections and assumptions. Forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. These statements are not guarantees of future performance and involve certain risks and uncertainties, which are difficult to predict. Therefore, actual future results, performance and trends may differ materially from these forward-looking statements due to a variety of factors, including, without limitation: scope and length of customer contracts; governmental regulations and approvals; changes in governmental budgeting priorities; general market, political and economic conditions in the countries in which the Company operates or sells, including Israel and the United States among others; differences in anticipated and actual program performance, including the ability to perform under long-term fixed-price contracts; and the outcome of legal and/or regulatory proceedings. The factors listed above are not all-inclusive, and further information is contained in Elbit Systems Ltd.'s latest annual report on Form 20-F, which is on file with the U.S. Securities and Exchange Commission. All forward-looking statements speak only as of the date of this release. The Company does not undertake to update its forward-looking statements.
