

## Elbit Systems of America Subsidiary Selected for U.S. Army Tank Components

August 14, 2019

### Real-Time Laboratories, LLC to complete work on components in Florida

FORT WORTH, TEXAS, Aug. 14, 2019 /PRNewswire/ -- The United States Army selected an Elbit Systems of America subsidiary, Real-Time Laboratories, LLC (RTL) for the development of Turret Distribution Manifolds for the U.S. Army's M1 Abrams tank. Work for this award will be performed in Boca Raton, Florida.

The Turret Distribution Manifold is a hydraulic component, essential to the operations of the massive M1 Abrams tank, which takes commands from the control handles of both the gunner and commander of the tank. Those commands rotate the turret atop the vehicle, raise or lower the tank's gun barrel or load ammunition. This technology was designed by RTL and remains a trusted and dependable solution.

"Real-Time Laboratories has a long history with the M1 Abrams tank. We understand this platform and are continuing to refine various components, so they're optimal for the soldiers operating these large battle tanks," said Bob Knabe, general manager of RTL.

The company is currently producing seven components for the M1 Abrams tank.

### About Elbit Systems of America, LLC

### Forward Looking Statement

This press release contains forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended) regarding Elbit Systems Ltd. and/or its subsidiaries (collectively the Company), to the extent such statements do not relate to historical or current fact. Forward-looking statements are based on management's expectations, estimates, projections and assumptions. Forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. These statements are not guarantees of future performance and involve certain risks and uncertainties, which are difficult to predict. Therefore, actual future results, performance and trends may differ materially from these forward-looking statements due to a variety of factors, including, without limitation: scope and length of customer contracts; governmental regulations and approvals; changes in governmental budgeting priorities; general market, political and economic conditions in the countries in which the Company operates or sells, including Israel and the United States among others; differences in anticipated and actual program performance, including the ability to perform under long-term fixed-price contracts; and the outcome of legal and/or regulatory proceedings. The factors listed above are not all-inclusive, and further information is contained in Elbit Systems Ltd.'s latest annual report on Form 20-F, which is on file with the U.S. Securities and Exchange Commission. All forward-looking statements speak only as of the date of this release. The Company does not undertake to update its forward-looking statements.
