

Elbit Systems of America to Provide Full Motion Video Data Link Power Amplifiers for the F-35 Lightning II

February 28, 2020

FORT WORTH, Texas, Feb. 28, 2020 /PRNewswire/ -- Elbit Systems of America (NASDAQ: ESLT) (TASE: ESLT) was selected by Cubic Mission Solutions to design and develop the Full Motion Video Data Link (FMVDL) amplifier module for the communications suite of the F-35 Lightning II aircraft. The amplifier module is a critical component of increasing the aircraft's advanced sensor suite by providing enhanced situational awareness to both airborne and ground forces. The F-35 FMVDL modules will be designed and manufactured at Elbit Systems of America in Fort Worth, Texas.

"This selection demonstrates Elbit America's reputation as a leader in providing innovative airborne amplifiers for military tactical communications. Our F-35 full motion video amplifier modules provide the power behind the F-35's integrated communication/data link system and enable warfighters to have full situational awareness, while boosting the 5th generation combat capability of the aircraft," said Joel Friederich, Vice President of C4I & Homeland Security Solutions at Elbit Systems of America.

Building off its legacy of airborne amplifiers, Elbit Systems of America's solutions significantly boosts power for the F-35 communication suite, while reducing the unit's size. These aspects enhance the ability of the aircraft to send and receive critical information, thereby extending situational awareness from one aircraft to an entire network of warfighters, whether they're airborne or providing ground operations.

To date, Elbit Systems of America has supplied a variety of components for the F-35, from the UHF/VHF power amplifier, to the panoramic cockpit displays, to the unprecedented F-35 Helmet Mounted Display System.

Forward Looking Statement

This press release contains forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended) regarding Elbit Systems Ltd. and/or its subsidiaries (collectively the Company), to the extent such statements do not relate to historical or current fact. Forward-looking statements are based on management's expectations, estimates, projections and assumptions. Forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. These statements are not guarantees of future performance and involve certain risks and uncertainties, which are difficult to predict. Therefore, actual future results, performance and trends may differ materially from these forward-looking statements due to a variety of factors, including, without limitation: scope and length of customer contracts; governmental regulations and approvals; changes in governmental budgeting priorities; general market, political and economic conditions in the countries in which the Company operates or sells, including Israel and the United States among others; differences in anticipated and actual program performance, including the ability to perform under long-term fixed-price contracts; and the outcome of legal and/or regulatory proceedings. The factors listed above are not all-inclusive, and further information is contained in Elbit Systems Ltd.'s latest annual report on Form 20-F, which is on file with the U.S. Securities and Exchange Commission. All forward-looking statements speak only as of the date of this release. The Company does not undertake to update its forward-looking statements.
