Impact of the COVID-19 Pandemic on the Company:

The Coronavirus disease 2019 (COVID-19) was declared a pandemic by the World Health Organization in March 2020. COVID-19 has had significant negative impacts on the worldwide economy, resulting in disruptions to supply chains and financial markets, significant travel restrictions, facility closures and shelter-in-place orders in various locations. Elbit Systems is closely monitoring the evolution of the COVID-19 pandemic and its impacts on the Company's employees, customers and suppliers, as well as on the global

economy.

As we last reported on May 26, 2020, we have been taking a number of actions to protect the safety of our employees as well as maintain business continuity and secure our supply chain. We also reported on a number of activities where we are leveraging our technological capabilities to assist hospital staffs and other first responders protecting our communities from the impact of the pandemic. All of these actions remain ongoing.

During the first and second quarters of 2020 our business was not materially impacted by the pandemic, although some of our businesses are experiencing certain disruptions due to government directed safety measures, travel restrictions and supply chain delays.

We have implemented a series of cost control measures to help limit the financial impact of the pandemic on the Company, in parallel to the measures we are taking to maintain business continuity and deliveries to our customers. We also are working on efficiency initiatives with a number of our suppliers. We continue to evaluate our operations on an ongoing basis in order to adapt to the evolving business environment.

While our commercial avionics business line has been negatively affected by the pandemic's impact on the commercial aviation market, most of our defense markets have continued to show relative stability. We are continuously analyzing our business and its vulnerability to the possible future impact of the pandemic.

We believe that as of June 30, 2020, Elbit Systems had a healthy balance sheet, adequate levels of cash and access to credit facilities that provide liquidity when necessary. We have given high priority to cash management and adequate cash reserves to run the business.

The extent of the impact of COVID-19 on the Company's performance will depend on future developments including the duration and spread of the pandemic, the measures adopted by governments to limit the spread of the pandemic and resulting actions that may be taken by our customers and our supply chain, all of which are uncertain. As noted in our annual report on Form 20-F, the preparation of financial reports such as our quarterly financial results requires us to make judgments, assumptions and estimates that affect the amounts reported. For our quarterly financial results for the quarter ended June 30, 2020, we considered the economic impact of the COVID-19 pandemic on our critical and significant accounting estimates. The expected impact of the COVID-19 pandemic did not have a material effect on our significant judgments, assumptions and estimates reflected in the results. However, our future results may differ materially from our estimates. As events continue to evolve in connection with the COVID-19 pandemic, the estimates we use in future periods may change materially.

*** Non-GAAP financial data:**

The following non-GAAP financial data is presented to enable investors to have additional information on the Company's business performance as well as a further basis for periodical comparisons and trends relating to the Company's financial results. The Company believes such data provides useful information to investors by facilitating more meaningful comparisons of the Company's financial results over time. Such non-GAAP information is used by the Company's management to make strategic decisions, forecast future results and evaluate the Company's current performance. However, investors are cautioned that, unlike financial measures prepared in accordance with GAAP, non-GAAP measures may not be comparable with the calculation of similar measures for other companies.

The non-GAAP financial data includes reconciliation adjustments regarding non-GAAP gross profit, operating income, net income and diluted EPS. In arriving at non-GAAP presentations, companies generally factor out items such as those that have a non-recurring impact on the income statements, various non-cash items including significant exchange rate differences, significant effects of retroactive tax legislation, changes in accounting guidance, financial transactions and other items not considered to be part of regular ongoing business, which, in management's judgment, are items that are considered to be outside of the review of core operating results.

In the Company's non-GAAP presentation, the Company made certain adjustments, as indicated in the table below.

These non-GAAP measures are not based on any comprehensive set of accounting rules or principles. The Company believes that non-GAAP measures have limitations in that they do not reflect all of the amounts associated with the Company's results of operations, as determined in accordance with GAAP, and that these measures should only be used to evaluate the Company's results of operations in conjunction with the corresponding GAAP measures. Investors should consider non-GAAP financial measures in addition to, and not as replacements for or superior to, measures of financial performance prepared in accordance with GAAP.
