***Backlog of orders at \$9.7 billion; Revenues at \$1,022 million;
Non-GAAP net income of \$66 million; GAAP net income of \$50 million; Non-GAAP net EPS of
\$1.54; GAAP net EPS of \$1.18***

Haifa, Israel, May 28, 2019 – Elbit Systems Ltd. (NASDAQ: ESLT and TASE: ESLT), (the "Company") the international high technology company, reported today its consolidated results for the quarter ended March 31, 2019.

In this release, the Company is providing US-GAAP results as well as additional non-GAAP financial data, which are intended to provide investors a more comprehensive understanding of the Company's business results and trends. Unless otherwise stated, all financial data presented is GAAP financial data.

Management Comment:

Bez halel (Butzi) Machlis, President and CEO of Elbit Systems, commented: "The results of the first quarter of 2019 mark the first full quarter that includes the results of IMI. I am pleased with our results, especially the 25% growth in revenue with a well-diversified global presence in which our major geographic regions grew on an absolute basis. Our economies of scale enabled us to maintain a similar level of operating margins despite lower gross margins following the IMI acquisition. The significant increase in our backlog and the progress in the integration of IMI into the Company, support our long-term growth potential."

First quarter 2019 results:

Revenues in the first quarter of 2019 were \$1,021.7 million, as compared to \$818.5 million in the first quarter of 2018. The strong growth was mainly driven by the consolidation of IMI and Universal performance in the first quarter of 2019.

Non-GAAP (*) gross profit amounted to \$283.4 million (27.7% of revenues) in the first quarter of 2019, as compared to \$239.8 million (29.3% of revenues) in the first quarter of 2018. **GAAP gross profit** in the first quarter of 2019 was \$277.6 million (27.2% of revenues), as compared to \$235.4 million (28.8% of revenues) in the first quarter of 2018.

Adoption of New Accounting Standard:

The Company adopted Accounting Standards Update (ASU) 2016-02, Leases (ASC 842), effective January 1, 2019, using a modified retrospective transition method. Consequently, periods prior to January 1, 2019 are not restated for the adoption of ASU 2016-02.

Leases (ASC 842), as amended, requires lessees to recognize a Right of Use ("ROU") asset and lease liability on the balance sheet for most lease arrangements and expands disclosures about leasing arrangements for both lessees and lessors, among other items. We adopted ASU 2016-02 using the optional transition method whereby we applied the new lease requirements under ASU 2016-02 through a cumulative-effect adjustment.

We recognized approximately \$370 million of ROU operating lease assets and lease liabilities as a result of adopting this standard. As part of our adoption, we elected all of the available practical expedients with the exception of the practical expedient permitting the use of hindsight when determining the lease term and assessing impairment of ROU assets. The adoption of the standard increased our financial expenses in the first quarter of 2019, in the amount of \$9.3 million as a result of exchange rate differences on lease liabilities denominated in foreign currencies (mainly NIS). The comparative periods have not been restated for the adoption of ASU 2016-02.

*** Non-GAAP financial data:**

The following non-GAAP financial data is presented to enable investors to have additional information on the Company's business performance as well as a further basis for periodical comparisons and trends relating to the Company's financial results. The Company believes such data provides useful information to investors by facilitating more meaningful comparisons of the Company's financial results over time. Such non-GAAP information is used by the Company's management to make strategic decisions, forecast future results and evaluate the Company's current performance. However, investors are cautioned that, unlike financial measures prepared in accordance with GAAP, non-GAAP measures may not be comparable with the calculation of similar measures for other companies.

The non-GAAP financial data includes reconciliation adjustments regarding non-GAAP gross profit, operating income, net income and diluted EPS. In arriving at non-GAAP presentations, the Company factors out items such as those that have a non-recurring impact on the income statements, various non-cash items, including significant exchange rate differences, significant effects of retroactive tax legislation and changes in accounting guidance and other items, which in management's judgment, are items that are considered to be outside of the review of core operating results.

In the Company's non-GAAP presentation, the Company made certain adjustments, as indicated in the table below.

These non-GAAP measures are not based on any comprehensive set of accounting rules or principles. The Company believes that non-GAAP measures have limitations in that they do not reflect all of the amounts associated with the Company's results of operations, as determined in accordance with GAAP, and that these measures should only be used to evaluate the Company's results of operations in conjunction with the corresponding GAAP measures. Investors should consider non-GAAP financial measures in addition to, and not as replacements for or superior to, measures of financial performance prepared in accordance with GAAP.
